ABOUT COMPANY

Introduction:

SecureTech Solutions is a leading global provider of cutting-edge computer security products and solutions since 20 years in the global market with a strong commitment to innovation and a focus on safeguarding digital assets, we have been at the forefront of the IT industry for over a decade. Our mission is to empower businesses and individuals with the tools they need to defend against evolving IT threats and protect their sensitive data.

SecureTech Solutions is a leading provider of data security such as comprehensive PC protection, Windows protection, software protection, data protection, and data recovery solutions. With a passion for safeguarding digital assets, we have been empowering businesses and individuals to navigate the complex world of cybersecurity with confidence. Our commitment to excellence, innovation, and customer satisfaction makes us the go-to partner for all your cybersecurity needs.

Our Vision:

To be the most trusted and reliable partner in the IT security space, providing top-notch products and services that enhance digital safety and resilience for clients worldwide.

Core Values

Innovation: Constantly pushing the boundaries of IT security technologies to stay ahead of emerging threats.

Integrity: Upholding the highest ethical standards and maintaining transparency with our clients, employees, and partners.

Customer-Centric Approach: Understanding our clients' needs and delivering tailor-made solutions to address their unique security challenges.

Excellence: Striving for excellence in everything we do, from product development to customer support.

Collaboration: Fostering a collaborative environment to leverage the collective expertise of our team, clients, and partners.

Our Products & Services

Data Protection: With our data protection solutions, clients can secure their sensitive data at rest, in transit, and during storage. We provide data encryption, data loss prevention, and secure file-sharing solutions to safeguard valuable information.

SecurePc products: Our SecurePc Products offer multiple protection for PCs & Laptops that mainly includes:

Windows Protection: We offer specialized security solutions tailored to protect Windows operating systems from vulnerabilities, exploits, and zero-day attacks, ensuring a robust and secure IT environment.

Software Protection: Our software protection solutions safeguard applications and software from unauthorized access, tampering, and reverse engineering, ensuring the integrity and security of valuable intellectual property.

Data Protection & Data Recovery: Our data protection solutions include data encryption, secure backup, and disaster recovery services, ensuring the confidentiality and availability of critical data in the face of cyber incidents.

Best Remote Management for IT Support: Our Remote management software allows IT support teams to access and troubleshoot systems from anywhere, eliminating the need to be physically present on-site. This enhances the convenience of IT support delivery and reduces response time.

PRODUCT INTRODUCTION

SecurePc V11.0 is a powerful computer data protection hardware, which can quickly solve the problem of personal, enterprise and other office computer data error, delete, format partition, empty recycle bin files by mistake and hard disk partition lost. Restore file types: photos, pictures, office documents, TXT documents, compressed packages, common audio, video files, exe files and other types. It is useful for computers, notebooks, all-in-one machine, workstation, server, etc. For users to create the best data restore software, to ensure the safety and integrity of user data.

WINDOWS PROTECTION

SecurePc provides complete protection of Windows system files in case of file damage or corruption due to virus attacks and can automatically gives recovery on PC restart.
It saves your precious time to reinstall windows.

APPLICATION PROTECTION

SecurePc provides complete protection to any type of application software from damages & virus attacks. It saves your time to reinstall softwares & applications.

FILE PROTECTION

SecurePc provides complete protection to your important files, folders, pictures, videos & audios from damages & corruption.

Features at a glance

- Data backup and restore of dual hard disk system.
- Data backup and restore of non-system partition.
- BIOS layer quickly recovers user system partition.

Technical Characteristics at a glance

- Support the new UEFI BIOS architecture.
- Support GPT format and MBR format not supported.
- A new Linux kernel level algorithm.
- Data restore efficiency increased by 40%.

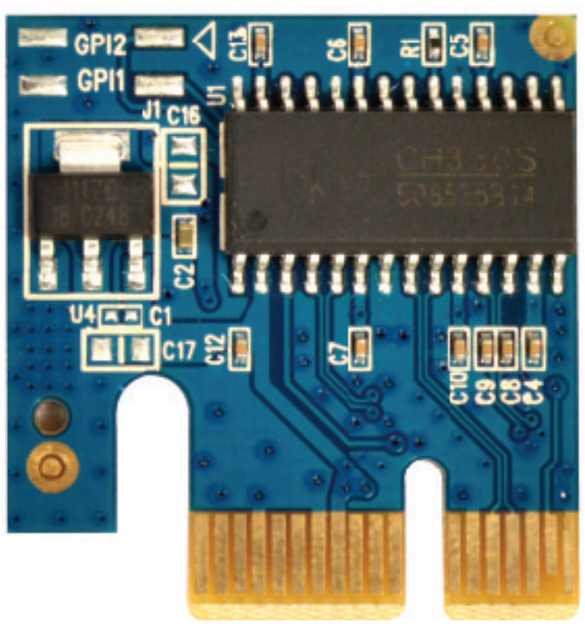
Initial restore: initial restore refers to the users restore of computer state to the initial installation state.

Quick restore: quick restore refers to the users restore of computer state to the last saved data state.

Windows Platform: Windows operating system (Version 7/8/8.1/10/11)

BIOS Platform: Device boot layer Warning

Hard disks Support: SCSI hard disk, RAID disk volume and 3 or more than three hard disks are not supported.



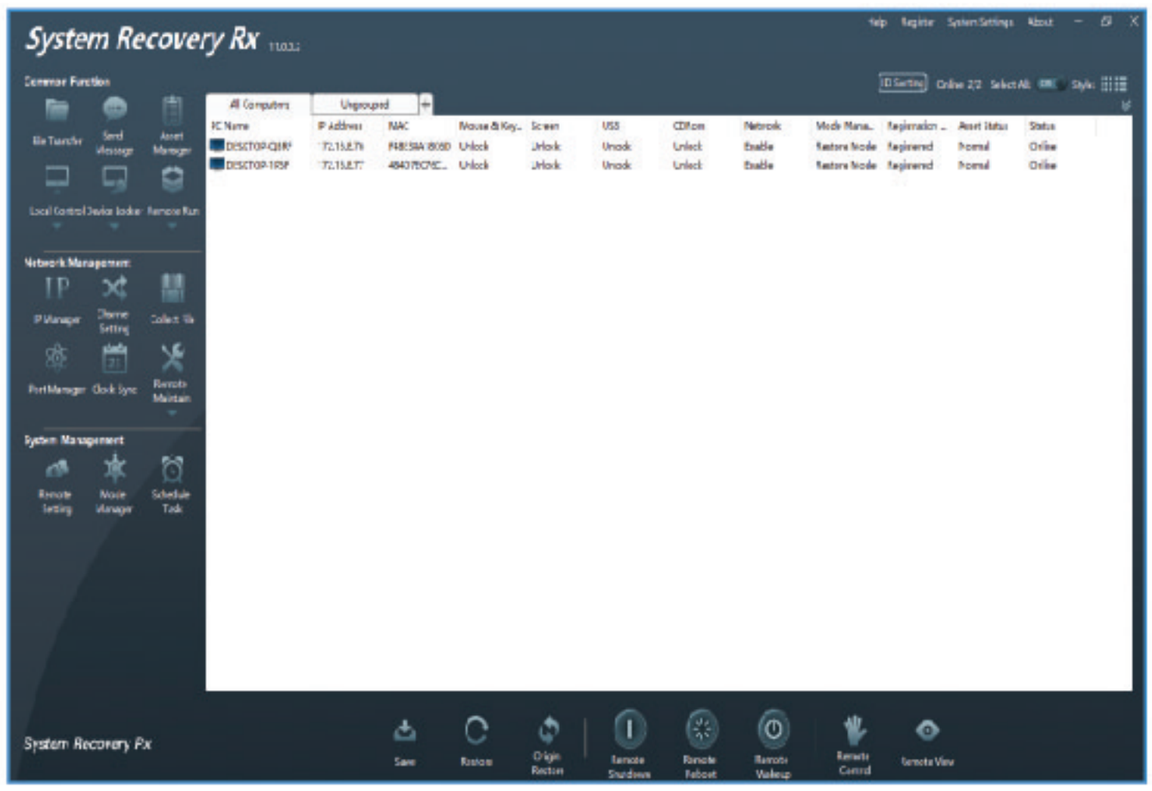
VIRUS PROTECTION

SecurePc Card provides complete protection of files & folders in case of virus attacks. Any file that is damaged or corrupted by any virus will be restored after the PC will be restarted & Virus will go out from the system.

REMOTE ADMIN and SUPPORT

Remote management software allows IT support teams to access and troubleshoot systems from anywhere, eliminating the need to be physically present on-site. This enhances the convenience of IT support delivery and reduces response time.

FUNCTION INTRODUCTION

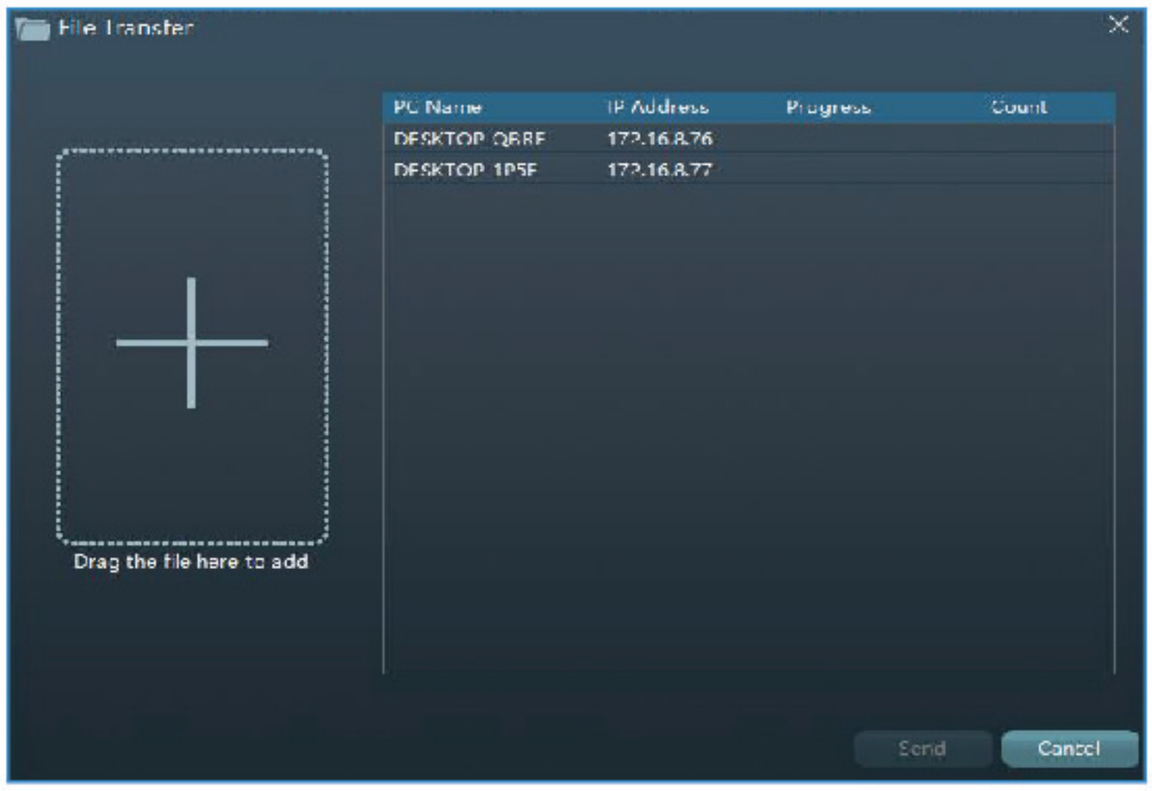


SERVER

- Multi-Partition type support
- Dual hard disk protection / restore
- Dual hard disk smart index
- Multiple network card support
- Fast Recovery
- Fast Save
- Channel Management
- File Transfer
- Asset Management
- IP management
- Message management
- Device management
- Remote operation
- Port management
- Remote maintenance
- Planning tasks
- Privilege management
- Online duration
- Custom UI

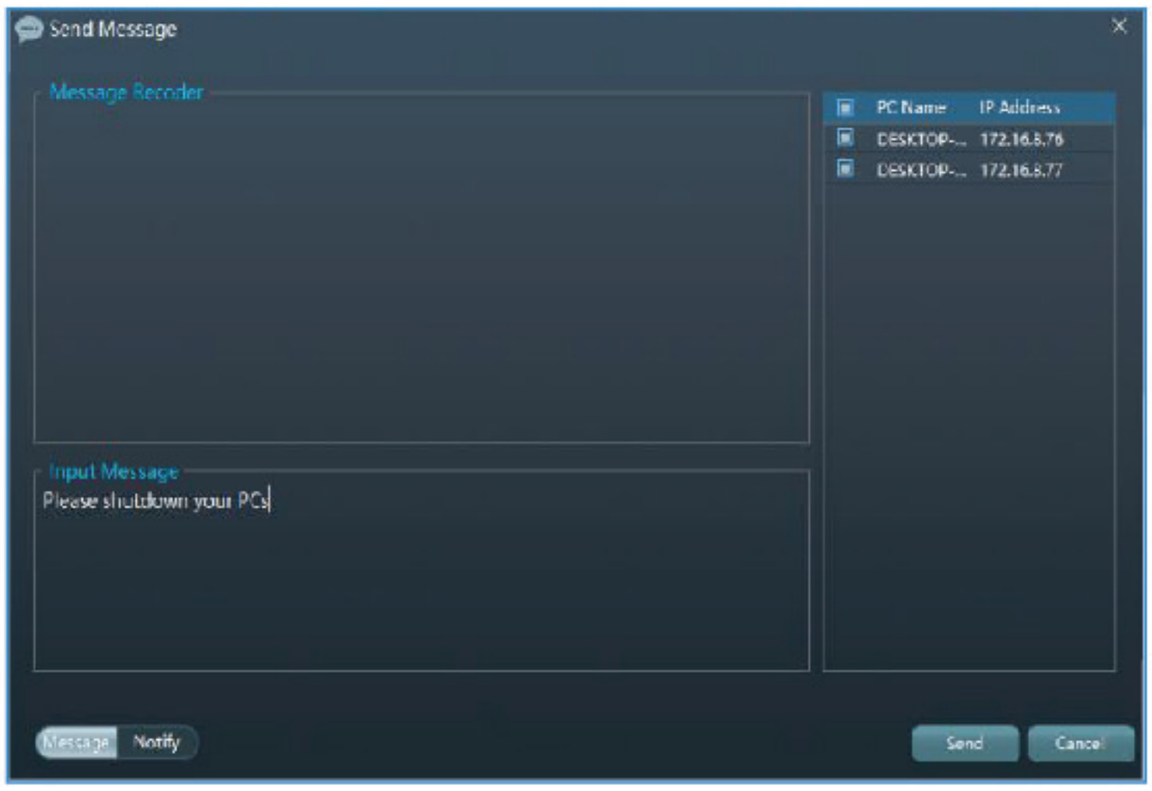
BIOS FUNCTION FEATURES

- Fast Save : User can save his current work.
- Custom Save : Users have option which drive data work should be saved.
- Fast Recovery : Users can get his last saved work.
- Custom Restore : User can decide which drive work has to be restored.
- Origin Restore : User can get his first time work saved.
- Partition Settings : User can select the drive he wants to protect.



FILE TRANSFER

- Administrator or host computer can transfer any file or software to all Workstations/Clients at the same time.

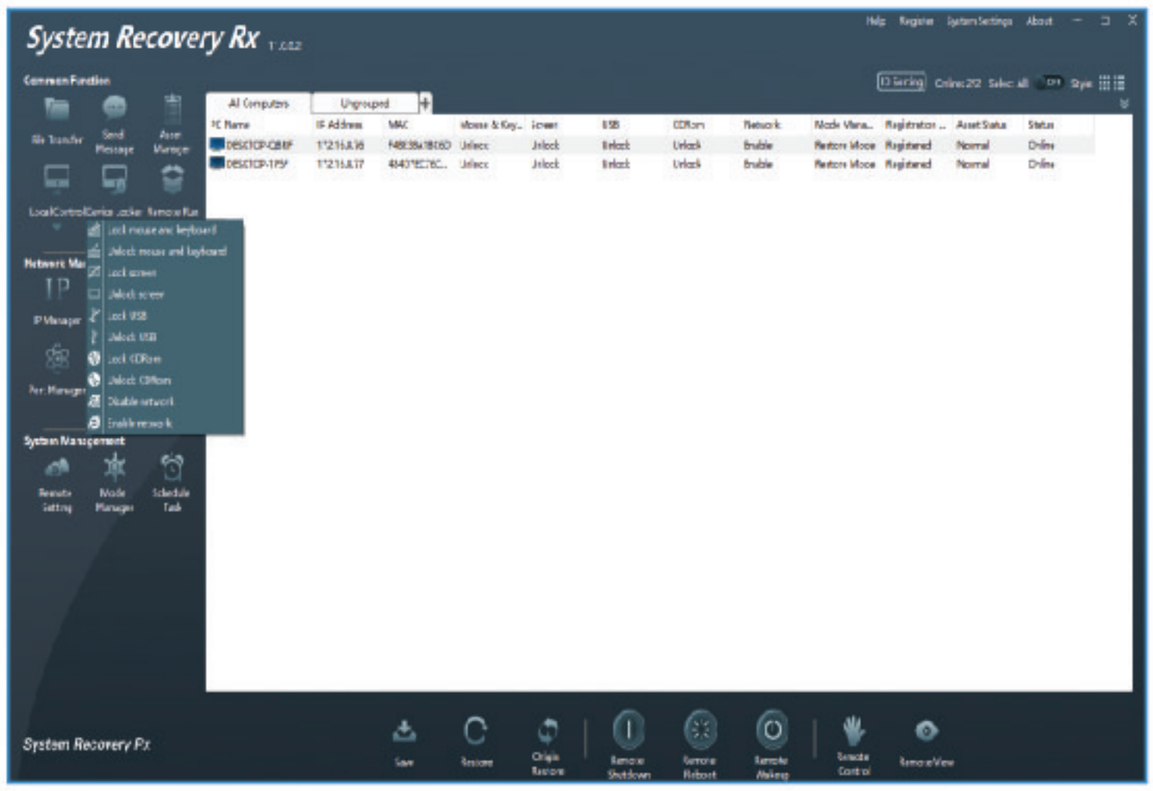


SEND MESSAGE

- Administrator can send messages or announcements to all Workstations/Clients within the network.

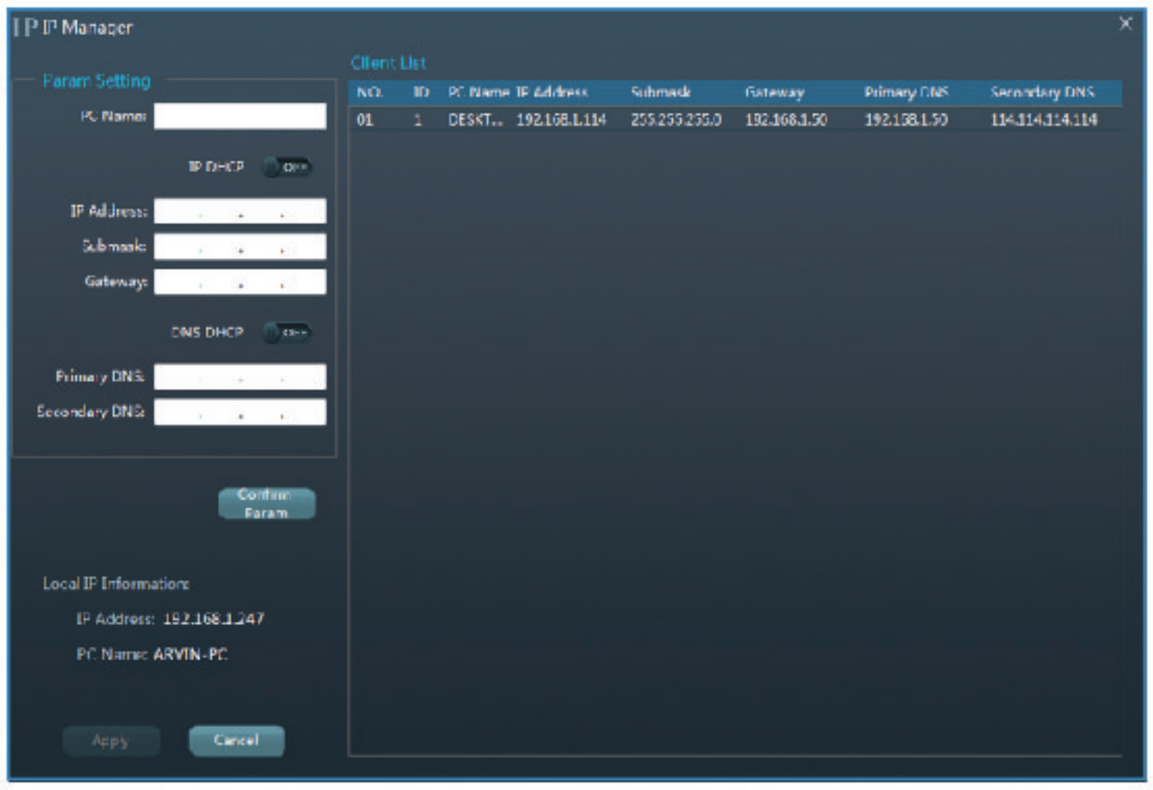
ASSET MANAGER

- Asset manager gives report about all Pcs with hardware specs & software list. This report can be sent to management.



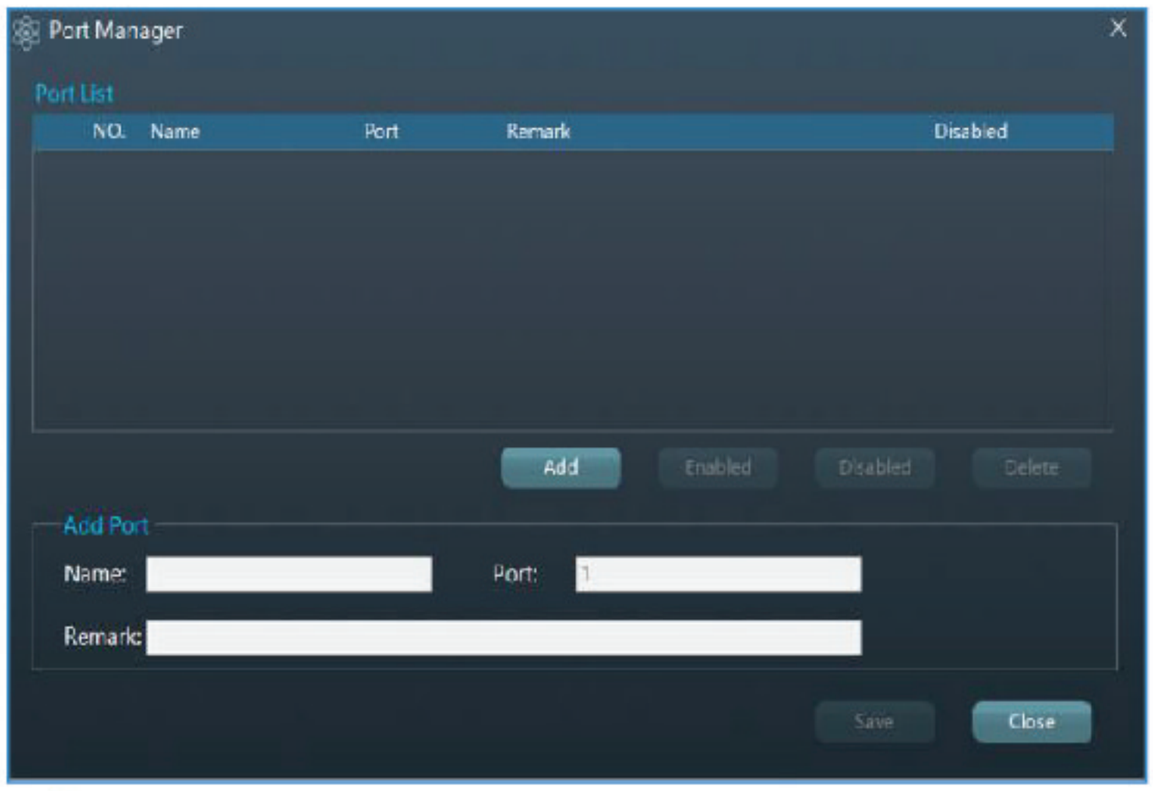
DEVICE LOCKER

- The host computer can lock the computer screen, keyboard and mouse, USB and CD drive of controlled computers.



IP MANAGER

- Host can modify any PC IP according to his need.



PORT MANAGER

- The host computer can restrict the port of the computer being controlled.

Dual hard disk protection:
Exclusive support for dual hard disk data protection.

Linux architecture:
Fully supports UEFI architecture

Data protection:
Supports document, picture, music, video and other types of data protection

Multi hard disk support:
Fully supports mechanical hard disk, SSD hard disk, m.2 hard disk, EMMC hard disk

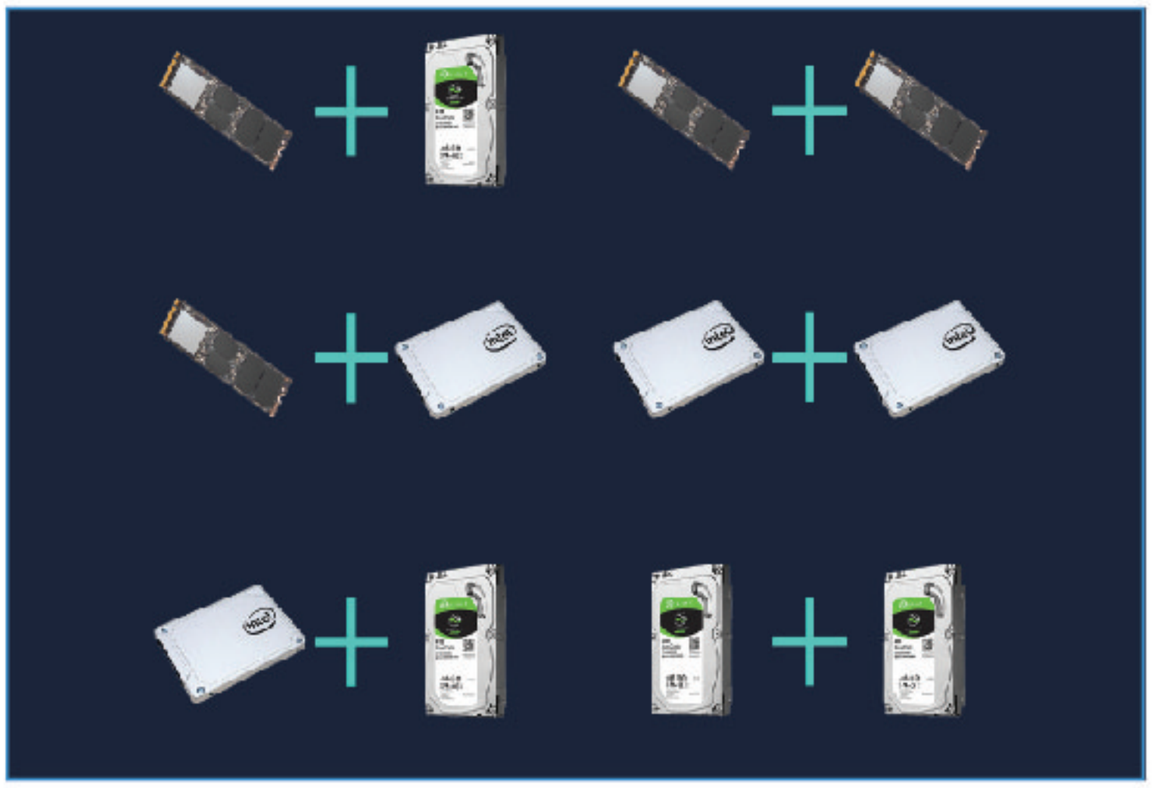
Recovery strategy:
Flexible choice of multiple recovery strategies

Backup strategy:
AES 256 bit high-strength encryption protection

Network management strategy:
IP management, port management, equipment management, asset management etc.

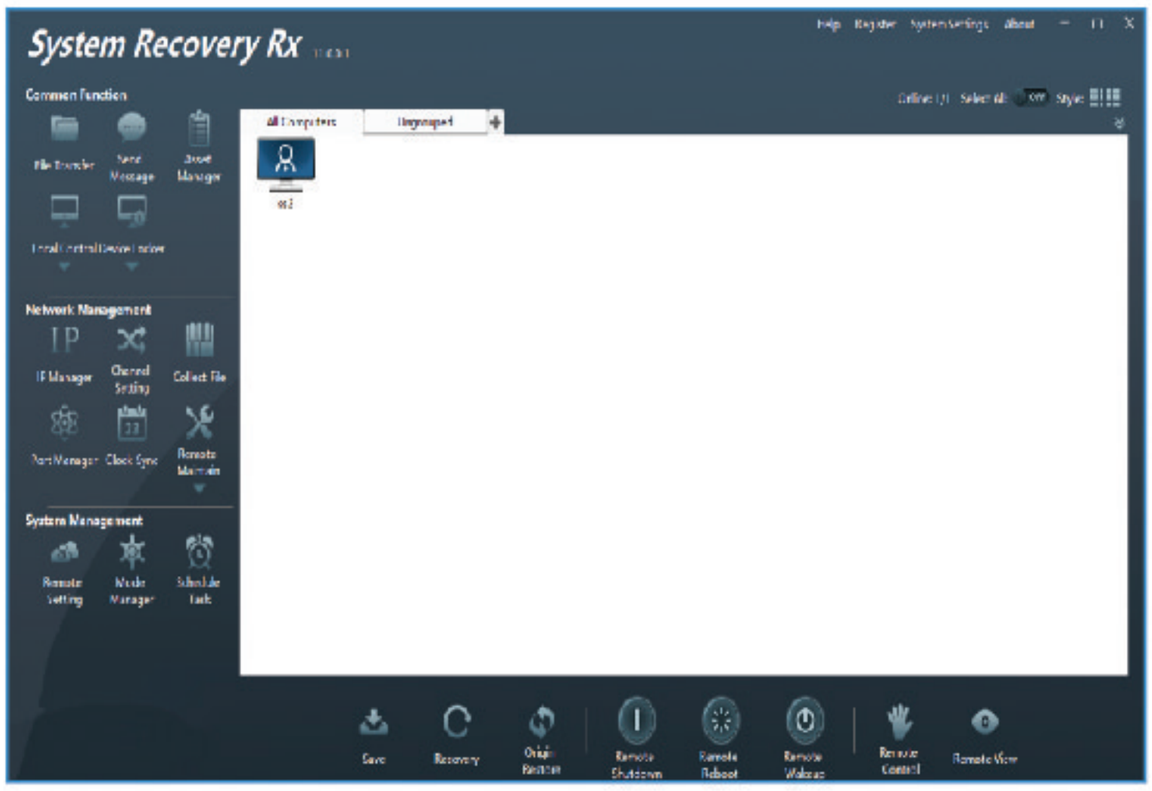
PRODUCT UPGRADE FEATURES

- New Linux kernel level data recovery algorithm improves data recovery speed by 40% compared to similar products.



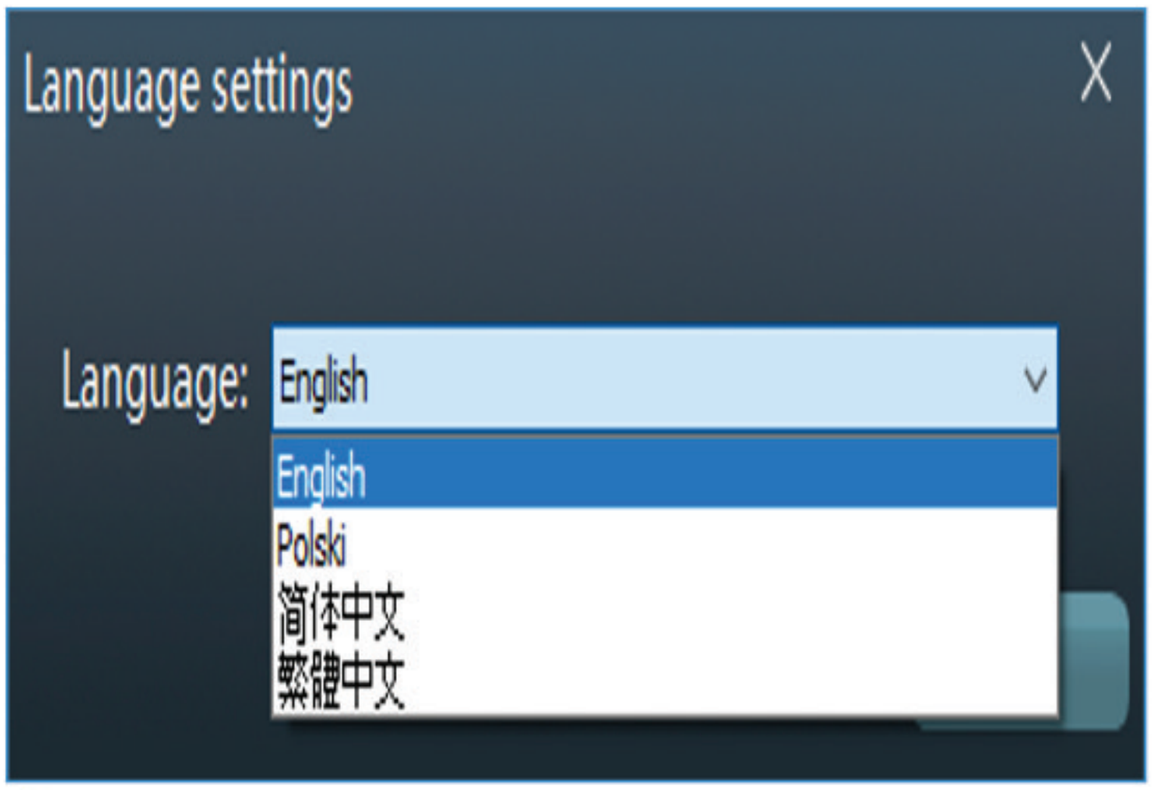
MULTIPLE HARDDISK SUPPORT

- Support the dual hard disk protection scheme of UEFI platform, and supports the combination of multiple hard disk types.



ENHANCED REMOTE FEATURES

- Host can remotely support all PCs/Workstations e.g trobleshooting services , file transfers, software copy & installation.
- Host can also monitor/view any PC by Remote view option.
- Host can shutdown all pcs remotely.

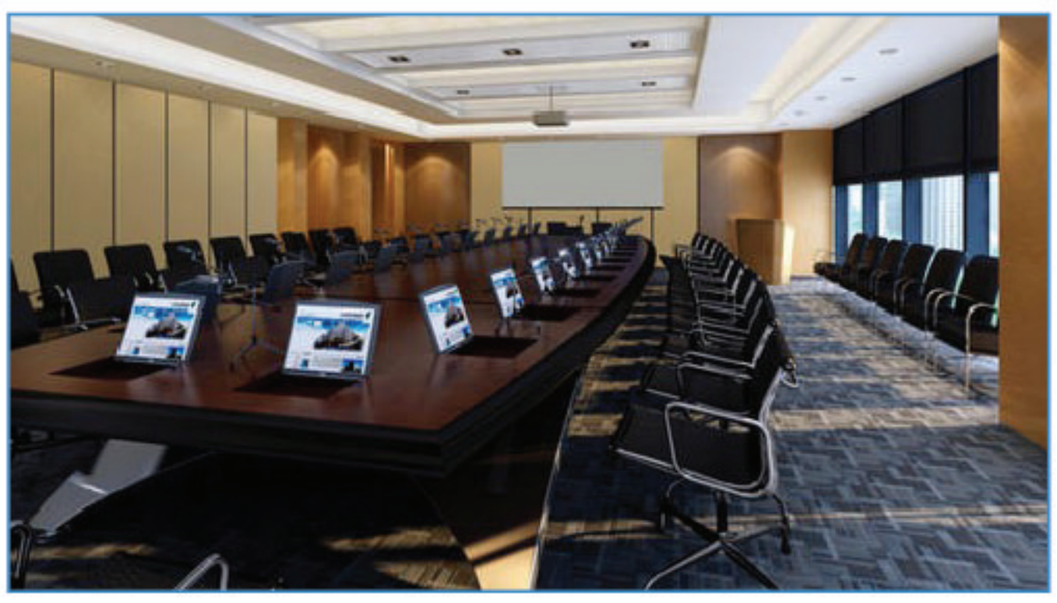


MULTILINGUAL SUPPORT

- Multiple language options for Function Menus.

COMPUTER LAB

SecurePc protects all computers in Computer lab from unwanted downloads, deletion of important files, installation of new software from students. It also maintains PC performance by deleting all garbage & temporary internet files on restart.

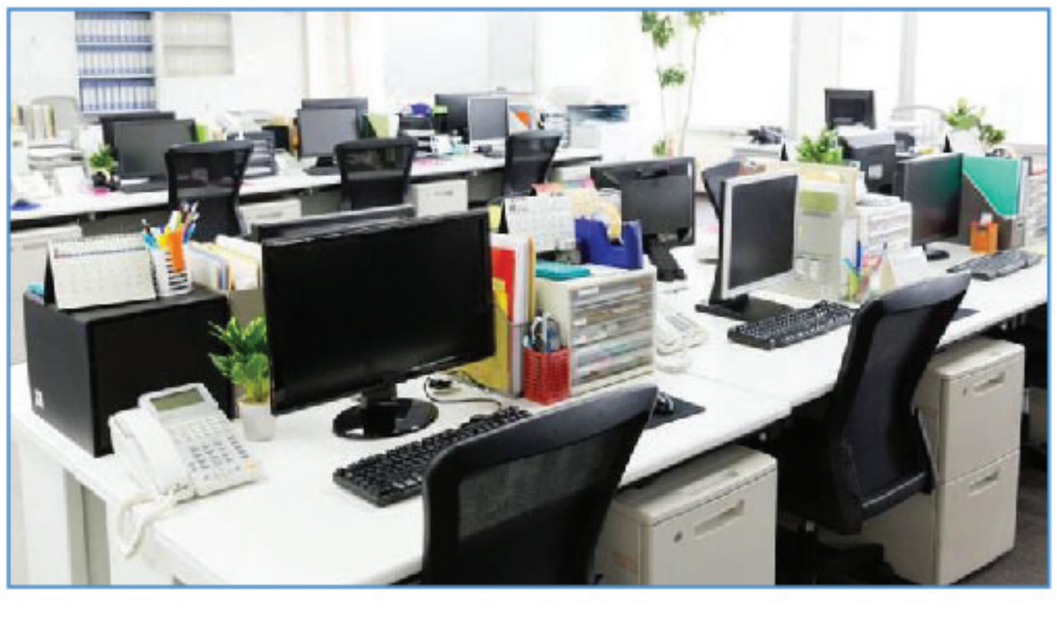


MULTIMEDIA CONFERENCE ROOM

SecurePc protects all Graphic softwares, Multimedia presentations, & application softwares.

GAMING CENTERS

SecurePc take cares of all gaming applications to run smoothly & faster.



CORPORATE IT SETUPS

SecurePc also plays vital role to safeguard sensitive corporate data. Important lost files, folders & documents can quickly be recovered in a matter of seconds.

Reduce IT Costs and increase Productivity

SecurePc makes your computer indestructible. SecurePC provides the ultimate workstation protection by preserving your desired computer configuration and settings.
Each time you restart your PC, SecurePc card restores the computer back to your configuration. Since long it has helped thousands of IT professionals manage millions of computers with minimal effort.

Reduce IT Tickets By 63%:

SecurePc ensures 100% workstation recovery with every restart. Customers report an average reduction of 63% in IT tickets.

Prevent Configuration Drift:

Prevent computers from straying from their baseline configuration, while still allowing users to save their work.

Achieve License Compliance:

SecurePc removes all software installed without your authorization with a single reboot, helping your organization achieve license compliance.

Completely Non-Restrictive:

Provides users with unrestricted access while preventing permanent configuration changes.

Empower End Users:

Minimize reliance on IT staff for trivial issues, allowing them to focus on more important tasks.

SecurePc can Reduce Your IT Support Tickets by up to 63%

SecurePC means .... Total Peace of Mind!

A67, Block 13-D/1, Gulshan-e-Iqbal, Karachi, Pakistan.
